Profile

As a Frontend Developer with an MSc in Applied Biology, I offer a unique fusion of scientific expertise, a decade of research experience, and proficiency in coding, blending creativity and technical skills. As an experienced traveler, I enjoy immersing myself in local cultures and capturing their essence through photography. As a sci-fi aficionado, I am constantly inspired by the boundless possibilities of the genre. My love for my two plump Siamese companions, further reflects my caring and empathetic nature. If you're looking for a dynamic team player, with an adventurous spirit, eager to launch himself into innovative projects and adapt to constantly changing environments, but always learning and embracing challenges, you've found the right person! 🦄
